

Information Problem: Dinner Waits on the Ave

The winters of Washington state can be brutal, but the painfully ambiguous 45-minute dinner lines wrapping around the Ave during the aforementioned winters are far worse. Our group endeavors to find a solution that efficiently minimizes student exposure to the Ave and maximizes student exposure to the Ave's restaurants; that is, we want to find a way to inform students of long lines on a venue-by-venue basis, so that they may effectively circumnavigate long waits in the dreary weather before even leaving their dorms.
